Annual Report

2001–2002

Dear Friends of Earth Island,

We are pleased to present Earth Island Institute's Annual Report for 2001. As you look through it, you will see the financial highlights of the past year, and, more importantly, the dramatic accomplishments of the projects of Earth Island. Our model of incubating individual aspirations into successful projects continues to have success in ways that we never imagined. Every day we are mindful of the legacy of David Brower as we seek to inspire, educate, and nurture action for the environment.

As we enter our twentieth year our future is more promising than ever. In 2002 one of our larger projects, Bluewater Network, will spin off into its own non-profit organization. Among our exciting incoming projects is Eco-Village West, which will provide environmental education for urban children on a beautiful farm in Richmond, California. Amidst all the strides of our ongoing projects, our World Sustainable Hearing project will go to South Africa in August to tell people's stories of globalization's impact alongside the more formal UN conference on environment and development. Meanwhile, *Earth Island Journal* will undergo a strategic redesign this year aimed at increasing its effectiveness in informing and mobilizing its readers.

The past year has shown us just how fractured the world community can be, and how much the Earth truly needs our help. Thank you for all of your support during the past year. If you are new to our community, we welcome and encourage you to look at our past accomplishments and join us in creating the future. Your contributions enable us to reach for our dreams and leave us poised to create a sustainable future for all of Earth's communities.

MISSION STATEMENT

Life on Earth is imperiled by human degradation of the biosphere. Earth Island Institute develops and supports projects that counteract threats to the biological and cultural diversity that sustain the environment. Through education and activism, these projects promote the conservation, preservation, and restoration of the Earth.

Robert S. Wilkinson

David Phillips

John A. Knox

PROJECT DESCRIPTIONS

ONE OF EARTH ISLAND'S CENTRAL ELEMENTS is our Project Network. This dynamic, worldwide group of approximately thirty issue-focused projects is taking effective, innovative action for the conservation, preservation, and restoration of the global environment.

In serving as sponsor and administrator for these projects, Earth Island provides critical organizational support, offering to project staff the benefits of working within an established organization as well as the freedom to focus on the development and implementation of campaign initiatives rather than administrative management. Considerable cross-pollination and collaboration adds value to individual projects. Staff, interns, and volunteers all have the opportunity to work with small, emerging projects while being part of one of the most well-respected, internationally recognized environmental organizations.

Once adopted by the Earth Island Board of Directors, each project charts its own program under the general supervision of Network Services staff. Projects manage their own fundraising efforts with foundations and the general public. We hope that the following section, which lists all Earth Island projects active at the end of 2001, provides you with a sense of each project's focus.

©RENE VOSS

Chad Hanson, Director of our John Muir Project, during a timber sale monitoring trip in the Tahoe National Forest. The Forest Service proposes to clearcut this land, claiming that this area was totally consumed by a fire and that no trees remained alive. It is within a designated old growth forest reserve and a California spotted owl Home Range Core Area. The John Muir Project will be appealing this timber sale, known as the Gap Fire salvage logging project.

ARAL SEA ENVIRONMENTAL ALLIANCE promotes local and international initiatives to ensure the survival of the Aral Sea and the people living in its basin. (aralsea@earthisland.org)

BAIKAL WATCH promotes international activities for the permanent protection of biologically rich Lake Baikal and Siberia, as well as other related initiatives

throughout Russia and northern Asia. (baikalwatch@earthisland.org)

BAY AREA WILDERNESS TRAINING (BAWT) leads adult youth workers in developing skills to conduct safe, high quality wilderness trips for young people, allowing them to borrow outdoor equipment free of charge to outfit their group. (info@bawt.org)

BLUEWATER NETWORK* aggressively confronts the root causes of climate change and fights environmental damage from the shipping, oil, auto, and motorized recreation industries. (311 California Street, Suite 510, San Francisco, CA, 94104; 415-544-0790; bluewater@bluewaternet.org)

BOREAL FOOTPRINT PROJECT aims to promote education about the ecological and human rights issues involved in the unsustainable use of resources from the boreal zone. (bfp@earthisland.org)

BORNEO PROJECT works with indigenous groups in Borneo to promote human rights, ecological justice, and community development through citizen diplomacy, training, mapping, alternative energy, education, and legal support. (1771 Alcatraz Avenue, Berkeley, CA, 94703; 510-547-4258; borneo@earthisland.org)

BROWER FUND provides advice, organizational support, and small grants for short-term campaigns and projects and works to preserve the integrity and public awareness of David Brower's vision and legacy. (mdavis@earthisland.org)

CAMPAIGN TO SAFEGUARD AMERICA'S WATERS assists conservation groups across the country in their efforts to protect local waters by limiting/eliminating the use of "mixing zones" (dilution zones) by industrial dischargers. (Box 956, Haines, AK, 99827; 907-766-3005; gershon@aptalaska.net)

CENTER FOR SAFE ENERGY works closely with environmental activists in the former Soviet Union to promote the develop-

ment of alternative clean energy technologies and energy conservation to replace reliance on CO²-producing fossil fuels and dangerous nuclear power stations. (2828 Cherry Street, Berkeley, CA, 94705; 510-883-1177; cse@earthisland.org)

CHINA BIODIVERSITY NETWORK promotes local and international programs which will help ensure the protection of key species and key habitats in China and its northern border regions. (1705 Hobart Street NW, Washington, DC, 20009; 202-588-9419; tadpole@igc.org)

CIRCLE OF LIFE FOUNDATION and Julia Butterfly Hill promote efforts to protect ancient forests, empower youth, and create alliances through education, outreach, and networking. (P.O. Box 3764, Oakland, CA, 94609; 510-601-9790; info@circleoflifefoundation.org)

CITY TALK organizes local and international discussions on topical issues on sustainable development through the Internet, meetings, newspapers, and radio. (city-talk@earthisland.org)

CLIMATE SOLUTIONS helps pioneer solutions to global warming by demonstrating a model of regional leadership that strengthens communities and creates economic opportunities. (610 4th Avenue E, Olympia, WA, 98502; 360-352-1763; info@climatesolutions.org)

EARTHINFO.ORG provides information to promote and support environmentally responsible decision-making and local action by using the power and reach of the Internet. (amynorquist@earthisland.org)

GLOBAL SERVICE CORPS provides service-learning opportunities for adult volunteer participants to work on village-based environmental and social justice projects while living in Tanzania and Thailand. (gsc@earthisland.org)

GRASSROOTS GLOBALIZATION NETWORK promotes democratic ways for people to create healthier local economies, safer communities, and a cleaner environment. (ggn@earthisland.org)

HYDRO NOVA (formerly Treatment Wetlands Organization) aims to change wastewater from on-site and small community systems from a disposal problem to a resource for beneficial use through education, research, and action to support the use of innovative treatment systems. (3001 Ashbrook Court, Oakland, CA, 94601; 510-534-7008; bobfeinbaum@earthlink.net)

INTERNATIONAL MARINE MAMMAL PROJECT (IMMP) is leading the global effort to stop the slaughter of dolphins, to end commercial whaling, and to end the use of drift nets and other destructive fishing practices. IMMP led the successful return of the orca whale Keiko to his native habitat in Iceland. (marinemammal@earthisland.org)

JOHN MUIR PROJECT's immediate goal is to end all timber sales on national forests and to redirect timber subsidies into worker retraining and ecological restoration. (P.O. Box 697, Cedar Ridge, CA, 95924; 530-273-9290; johnmuir@mindspring.com)

KIDS FOR THE BAY (formerly Estuary Action Challenge) collaborates with

teachers to inspire environmental consciousness in children and cultivate a love of learning. (1771 Alcatraz Avenue, Berkeley, CA, 94703; 510-985-1602; eaceii@aol.com)

MA'AT YOUTH ACADEMY works to improve public and environmental health in urban areas by developing and modeling multicultural environmental education, promoting economic opportunities for at-risk youth, and increasing community involvement in environmental protection. (445 Valley View Road, Suite D, Richmond, CA, 94803; 510-222-6594; mya@maatyouthacademy.org)

MANGROVE ACTION PROJECT's global network addresses the degradation of mangrove forest ecosystems and promotes the rights of local coastal peoples towards sustainable management of coastal environments. (P.O. Box 1854, Port Angeles, WA, 98362; 360-452-5866; mangroveap@olympus.net)

RETHINK PAPER is dedicated to protecting forests by promoting the production and consumption of ecologically sound paper and encouraging strategies that reduce paper use. (45425 SE Marmot Road, Sandy, OR, 97055; 503-668-5123; rtp@earthisland.org)

SACRED LAND FILM PROJECT works to deepen public understanding of sacred places, to rekindle respect and reverence for the land within technological society, and to help protect sacred sites and indigenous cultures by distributing its award-winning film "In the Light of Reverence." (P.O. Box C-151, La Honda, CA, 94020; 650-747-0685; eif@earthisland.org)

*Bluewater Network separated from Earth Island Institute in April 2002 and formed its own 501(c)(3) organization.

SAVE (SPOONBILL ACTION VOLUNTARY ECHO) INTERNATIONAL works with local communities to protect the habitat of Black-faced Spoonbill along the Asian Flyway by promoting alternative economic development and long-term sustainability of lagoons and local communities.

(UC Berkeley Department of Landscape Architecture, 202 Wurster Hall, Berkeley, CA, 94720; 510-594-9466; spoonbill@uclink4.berkeley.edu)

SOUTHERN ROCKIES WATERSHED NETWORK works to foster sustainable management of watershed resources in the Southern Rockies Eco-region of Colorado and northern New Mexico by monitoring and supporting community-based watershed initiatives.

(P.O. Box 1351, Boulder, CO, 80306; 720-849-6412; blewis@srwn.org)

TIBETAN PLATEAU PROJECT promotes biodiversity conservation and sustainable development of local communities in the Tibetan Plateau region through research, grassroots action, and public education. (tppei@earthisland.org)

TOMALES BAY INSTITUTE works to revive the concept of the commons in American public life and debate and to propose new ways to advance and protect the commons in all its many forms. (P.O. Box 427, Point Reyes Station, CA, 94956; 415-663-8560; jonrowe@earthlink.net)

WEST AFRICA RAINFOREST NETWORK-U.S., through education, advocacy, and technical assistance, supports international campaigns and local communities in West Africa to protect their livelihoods and the region's remaining 10% of rainforests from corporate and political destruction. (warn@earthisland.org)

WILDFUTURES works to develop and implement strategies that bridge the gap between science and activism. It provides tools and trainings to grassroots groups and individuals working to advance wildlife and habitat protection so that they become more effective on a local, state, and federal level.

(343 Wallace Way NE, Suite 12, Bainbridge Island, WA, 98110; 206-780-9718; snegri@igc.org)

WORLD SUSTAINABILITY HEARING project is organizing a hearing investigating UN progress or lack thereof since its Rio summit in 1992. The hearing will take place in South Africa and run parallel to the United Nations' Rio + 10 Summit on Sustainable Development scheduled for September 2002 in Johannesburg. (29 Hickory Avenue, Corte Madera, CA, 94925; 415-927-6636, ext. 101; kelly@wosh.org)

YGGDRASIL INSTITUTE works on nuclear and environmental issues in France and the U.S., including projects such as a "green" map of Paris and reports on U.S. uranium enrichment. (P.O. Box 131, Georgetown, KY, 40324; 502-868-9074; marybdavis@earthlink.net)

For more information on a particular project, please write, call, or e-mail them directly. Projects listed with no address are located at our 300 Broadway offices in San Francisco.

PROJECT HIGHLIGHTS FROM 2001

BLUEWATER NETWORK co-sponsored the opening of the nation's first retail biodiesel (vegetable fuel) station, making this renewable fuel available to diesel car and truck drivers for both commercial use and individual consumption. In connection with this event Bluewater Network petitioned US oil companies to give motorists a genuine green fuel choice by investing in biodiesel.

The **BORNEO PROJECT** completed a \$45,000 Micro-hydro project at the village of Long Lawen in Borneo, providing environmentally clean, renewable energy to 400 rural families.

The **BROWER FUND** helped launch "Transportation Involves Everyone" (TIE) to continue David Brower's work on transportation reform.

THE CIRCLE OF LIFE FOUNDATION brought international attention to the plight of ancient redwoods by conducting outreach to tens of thousands of university students.

CLIMATE SOLUTIONS is a founder of the new Last Mile Electric Coop that is working with rural electric utilities in the Pacific Northwest region to develop renewable energy projects.

So far, the Coop has attracted 16 electric co-ops from around the region as co-funding partners and over \$250,000 to move renewable energy projects forward.

CAMPAIGN TO SAFEGUARD AMERICA'S WATERS played a major role in the drafting and passing of cruise ship pollution control laws by the Alaska Legislature and by Congress.

GLOBAL SERVICE CORPS initiated an accredited college internship program with the University at Albany, SUNY and also established an AIDS/HIV program partnership with the Rotary Club in Arusha, Tanzania.

THE INTERNATIONAL MARINE MAMMAL PROJECT won a major lawsuit appeal in the 9th Circuit prohibiting the U.S. Secretary of Commerce from weakening the standards for the "dolphin-safe" tuna label. They also launched several new campaigns to protect the Pacific Northwest orcas and their habitats as well as campaigns to protect sea otters throughout Alaska and California.

The **JOHN MUIR PROJECT** reduced the volume logged under the timber sales program by 21% from fiscal year 2000 to fiscal year 2001.

3000 elementary school students, 120 teachers, and approximately 500 parents actively participated in **KIDS FOR THE BAY**'s programs on habitat restoration, pollution reduction techniques, and safe bay food consumption activities.

The **MANGROVE ACTION PROJECT** held its 5th successful "In the Hands of the Fishers" workshop in Sri Lanka.

MA'AT YOUTH ACADEMY disseminated public and environmental health information to over 5,000 people through public speeches, panel discussions, forums, and by staffing information tables at conferences.

The **SACRED LAND FILM PROJECT** broadcast its feature length film, "In the Light of Reverence," on the

national Public Broadcasting Service (PBS) television series "Point of View" (POV).

TIBETAN PLATEAU PROJECT implemented the Community Medicinal and Aromatic Plant Cultivation Program, a joint project to promote the conservation of Himalayan medicinal plant species diversity and to improve the livelihoods of indigenous communities in Nepal.

WILDFUTURES held a Message Development Training Workshop for 18 groups in the southwest working on carnivore and ecosystem protection. They also produced a 30 minute video, "On Nature's Terms — People and Predators Co-existing in Harmony."

"I would have no use for Pearly Gates or streets of gold if canyon wrens were not admitted."

—DAVID R. BROWER

ON NOVEMBER 14, 2001 we lost another giant in the Earth Island Family, Anne Brower. She died at the age of 88 in her Berkeley home after a long illness. Many in the Earth Island community may not realize the important role she had in our organization, tirelessly working to support and influence David's work. Anne and Dave met while the two were editors at UC Press working, as David later put it, "in an office so small, we had to get married."

Not surprisingly, they shared a love of good writing and a knack for the well-

turned phrase. Anne's diagnosis of the world's biggest environmental problem—"greedlock"—and many other "Browerisms" are properly attributed to Mrs. Brower. Always well-read and informed by her decades of work in various UC departments, Anne frequently introduced David to new ideas that fell outside the traditional boundaries of American conservation. These ideas, from Native American cultures to city

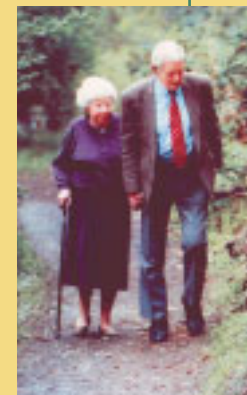

planning, inevitably turned up in the ever-expanding work of David's organizations. The name "Earth Island" is in fact borrowed from another piece of writing Anne introduced to her famous husband, Margaret Mead's "The Island Earth."

The legacy of the Browsers' vision can be seen not only in their environmental victories such as preventing dam construction in Grand Canyon and battling nuclear power to a standstill, but in the many individuals and projects they nurtured that are now key players in the movement for

Global CPR—Conservation, Preservation, and Restoration. Many successful organizations like Rainforest Action Network, International Rivers Network, and Urban Habitat share common roots as graduates from the Earth Island project network. Likewise, many modern environmental leaders, from Earth Island Executive Director Dave Phillips to world-renowned energy conservation expert Amory Lovins were recruited to work for Global CPR by the Brower vision.

The passing of the Browsers marks the end of an

era and begins the next phase of Earth Island's work for the Earth. Today we renew our commitment to carry on David's drive to find and cultivate the next Lovins, the next Phillips, and the next Brower, and to master Anne's knack for finding solutions that lie beyond the traditional horizons of environmental work. In following the trail they blazed so brightly in the last century, we can only hope to be as eloquent, effective, and compassionate as David and Anne Brower. May they rest in peace, together as ever.

Earth Island Institute is a member organization of Earth Share of California, which promotes environmental education and charitable giving campaigns through the payroll deduction program. Earth Share also participates in the Combined Federal Campaign for employees of the federal government and the military, as well as several local United Way campaigns.
